

# Job Description

**Job Title:** Finisher

**Department:** Production

**Organizational Relationship:** Reports directly to the Production Supervisor

**Job Description:** Performs fiberglass finishing activities as required by the customer and/or for production. The following are the duties and responsibilities of the Finisher – either performed directly and/or via subordinates:

- Finishes and repairs fiberglass components using spray gun, buffer, polish, compound putty and other required fillers
- Determine and select material abrasive production requirements and comply with grinding and polishing standards
- Complete the finishing process as required by production – remove scratches, fill voids, apply new finish, etc.
- Experience with various resins, gel-coats, fiberglass materials, foam and other adhesives
- Operate light hand power tools not limited to paint spray gun, buffer, sanders, drills, grinders, hoists and additional specialty tools as required for production
- Check and inspect, using a knowledge of fiberglass, for conformity and repair discrepancies if detected
- Follow safety and health standards – use of dust masks, respirators, gloves, eye protection and other protective equipment as required
- Ability to work 8+ hour day shifts (standing, bending and reaching) and moderate lifting up to 50 lbs. (standing 100%, bending 50%, kneeling 20%)
- Safety conscience - safety glasses, closed shoes, gloves, respirator/dust mask

**Preferred Qualifications:** To perform this job successfully the individual must be able to perform each assigned duty and responsibility satisfactorily. The requirements listed are representative of the knowledge, skill and/or ability required. Must read and write English and have a high school diploma or GED.

**Education/Experience/Competency:** 6 months to 1 year related experience and/or training; or equivalent combination of education and experience.
